

# ColorSeam

## Features & Benefits

- ColorSeam is a revolutionary two component Methyl Methacrylate which will provide a colour matched seamless look for Solid Surface Worktops.
- It can be used on Solid Surface and Composite Worktops made from Acrylic and Acrylic and Polyester blends for example – Corian, HI-MAC'S, Slab Tech, Earthstone, Avonite etc.
- It is available in a range of popular standard colours. We specialise in small batch production for special colour runs and we offer unrivalled colour accuracy (matching to DE <1.0) using the very latest computer based colour spectrometers. We have a database of matches from all the major solid surface manufacturers.
- ColorSeam is available in 50ml, 100ml and 250ml. 100ml can be used in a standard cartridge gun coupled with a gun adapter. 50ml and 250ml require a special applicator gun.

- ColorSeam has an advanced non-stain colour system. Once cured the bond line is UV stable and has a very high chemical and moisture resistance.
- ColorSeam is very versatile, it can be used for jointing kitchen and bathroom worktops. It can be used in laboratories, on reception counters, tables, hotel rooms etc.
- ColorSeam is manufactured by Unika - the Industries leading name in worktop jointing materials. It has been independently tested for UV and Strength.

## Directions: for use on a Composite Worktop

1. For full user instructions please see the 'Solid Surface Installation Components Booklet'.
2. Ensure both sides of the joint are perfectly matched and use alcohol wipes to clean the joint, allow to dry.
3. Mitre the worktop, fit connecting bolts and cut biscuit slots ready for installation.
4. Apply a continuous bead of ColorSeam along the full length of the top and bottom edge of the joint and front of the downturn. Apply also to the biscuit slots before putting the biscuits in place. Push the two parts of the worktop together.
5. Apply a second continuous bead of Adhesive to the top edge of the joint and fill the joint ensuring that sufficient adhesive is used so that when the worktops are brought together, a continuous bead of adhesive flows out of the joint area.
6. Tighten up the worktop bolts, checking for alignment.
7. Allow the adhesive to cure to a hard rubber consistency, approx 30 minutes.
8. Remove glue deposits on the surface with a wide sharp chisel taking care not to damage the worktop. Complete with the sanding process outlined in the 'Installation Components Booklet'.

## For use on a Solid Surface Worktop

1. For full user instructions please see the 'Solid Surface Installation Components Booklet'
2. Ensure both sides of the joint are perfectly matched and use alcohol wipes to clean the joint, allow to dry.
3. Fix timber blocks to either side of the joint and G Clamps to bring them together.
4. Apply a continuous bead of ColorSeam along the full length of the top and bottom edge of the joint. Push the two parts of the worktop together.
5. Apply a second continuous bead of Adhesive to the top edge of the joint and fill the joint ensuring that sufficient adhesive is used so that when the sheets are brought together, a continuous bead of adhesive flows out of the joint area.
6. Apply pressure to the joint with the G clamps, checking for alignment.
7. Allow the adhesive to cure to a hard rubber consistency, approx 30 minutes.
8. Remove G Clamps first then remove hot melt glue blocks and finally glue deposits on the surface with a wide sharp chisel taking care not to damage the worktop. Complete with the sanding process outlined in the 'Installation Components Booklet'.

### Retailer Opportunity:

- Sell with every Solid Surface and Composite worktop sale.
- ColorSeam will resist moisture, detergents and other household products as efficiently as the worktop.
- ColorSeam provides a permanent joint/repair.
- ColorSeam is a recognised brand name.
